DARK TOBACCO GROWERS PERFECT ORGANIZATION

Large Crowd of Farmers At
Court House Hear Passonneau
and Plan Pool Drive.

The court room of the Ohio County court house was crowded to capacity Thursday afternoon with representative tobacco raisers from all sections of the county. The meeting was called to order by Mr. S. O. Keown, who had theretofore been elected chairman of the temporary organization. The purpose of the meeting was stated by him and nominations for permanent county chairman asked for. Thereupon Mr. T. H. Black was elected to head the proposed co-operative pooling drive and Prof. W. P. Rhoads, temporary secretary was elected permanent secretary. Committee were then selected for each voting precinct in the county, who will have active charge of the pooling drive in their respective precincts. We will publish this full list shortly. After a permanent organization was thus effected, Col. Joseph Passonneau, of Hopkinsville, official organizer for the Dark Tobacco Growers Co-Operative Association, was introduced by Prof. Oscar Shultz in a most forceful and pleasing manner. Col. Passonneau then outlined the history of the co-operative marketing plan, explained in detail its workings and made a strong appeal to the tobacco raisers of this county to declare their independence of the buyers by the adoption of this plan. His address was clear and forcible and was enthusiastically received by the farmers. At its close a number of growers started the good work by signing the Association's pooling pledge. A good start has been begun and the movement will be actively pushed to a successful culmination, if the enthusiastic support of the leading agricultural interests of the county can avail. We are for the Sapiro plan and we will be glad to help in all reasonable ways toward its adoption in this county.

GREEN RIVER TOBACCO GROWERS FAST ORGANIZING

The Green River tobacco district one of the important sections of the dark district now being organized, is rapidly perfecting its organization forces and starting the real drive for members in the Dark Tobacco Growers Co-Operative association.

Davies county, according to its chairman, has signed upward of fifty per cent of its acreage, this report being made at the conclusion of a meeting of the county workers. The workers made splendid reports by districts, showing a sign up of from 55 to 100 per cent in those districts where work has actually been done.

Several of the Davies county committee went to Ohio county recently and perfected a temporary organization there and got the work planned. Information from that county is that it will pool solidly. Ohio county has always been a strong organization center. In every pool heretofore started of tobacco or other products of the farm, Ohio county has come up to the limit on organization and no trouble at all is anticipated in pooling the county within a short time.

McLean reports indicate splendid success is being attained there. Chairman Hull, of Calhoun, has his forces at work in every section of the county, which also has been strong for organization in the past. McLean is making such strides that they may go over the top even ahead of Davies.

Hancock and Breckinridge counties, the remaining ones in the Green River type district, are well underway as to organization and the growers are deeply interested and favorably inclined.—Contributed.

Mrs. Elenor Herr, and Mrs. Allen Doane, of Owensboro, were the guests of the latter's parents, Mr. and Mrs. J. I. Goodman, at the New Commercial Friday, paying this offee an appreciated call in the afternoon.

HARTFORD, KY., WEDNESDAY, AUGUST 9, 1922.

NO. 32

SATURDAY NIGHT—8 O'CLOCK IS LAST OPPORTUNITY TO SECURE BIG VOTE

**Half Million Bonus Votes Given On Each
\$15.00 Worth of Subscriptions Turned
In by 8 O'clock Saturday Night,
August 12th—Never Again
Will Subscriptions Earn
So Many Votes.**

NEVER AGAIN WILL SUBSCRIPTIONS EARN SO MANY VOTES.

SPECIAL RULING

The Half Million Club Offer ends at 8 o'clock Sharp Saturday night, August 12. But any mail received after the closing of the offer and which bears a postmark of not later than 8 p.m. August 12th, will apply on the Club Offer. Those who cannot get mail postmarked Saturday evening have privilege of making their report by telephone and then placing the subscriptions in the next mail bound for Hartford. This gives all contestants equal chance to work up to the last minute of the Club Offer.

If you wish to win your favorite votes you get on subscriptions of five years, ten years and twenty years.

Everyone who is interested in your success should give you a good big subscription at this time. Place the matter squarely before them. They cannot help you much at the end of the contest because their subscriptions will earn such a small number of votes compared with the number they will earn if turned in this week.

Those who fail to turn in all their subscriptions this week must accept a huge loss of votes on the ones they turn in after Saturday night has passed.

Saturday night marks the closing of the most important proposition of the entire contest. It is the end of the period when subscriptions earn the largest number of votes. Gain a lead now and you will have no difficulty in holding that lead. Saturday is the time to do your biggest and best work. Never after that date will subscriptions earn so many votes, by thousands and thousands. Each week from now until the end will show decreases in the number of votes given on subscriptions.

Pay particular attention to long term subscriptions. Note that a \$15 subscription earns 125,000 votes. It also makes up a Club which is worth 500,000 votes, giving a total of 625,000 on the \$15.

A \$30 subscription will earn 300,000 votes according to the regular table. It will also count as two of the Clubs, earning a total of ONE MILLION THREE HUNDRED THOUSAND VOTES.

A \$7.50 subscription earns 50,000 votes and will make a Club half complete.

Club Offer

Each \$15 turned in to credit of a contestant is called a Club. And each Club earns a Half Million extra votes. By "extra," we mean over and above the number given on each subscription, as shown by the regular table of votes, which will be found below.

In making up a Club, all subscriptions turned in are counted together. A Club may consist of only one subscription, or of several. Collection of back dues on subscriptions count equally with any other kind of payments.

A contestant is entitled to as many Clubs as can be completed by Saturday night, August 12th, at 8 o'clock. A Half Million extra votes are given for each \$15 a contestant turns in, or that is turned in to contestant's credit by friends.

The Club Offer ends 8 o'clock in the evening of August 12th. It will never be repeated, nor will it be extended for a single minute.

Guarantee

The Hartford Herald guarantees the above Club Offer to be the big, best offer of any kind of the entire contest, and farther that never after August 12th, will subscriptions earn so many votes by thousands and thousands.

Call On Friends

This is the time when friends should help their favorite contestants to win. If you are in the race call upon your best friends and relatives before Saturday and explain to them just how they can assist you. Show them how many

value of the subscriptions you send every chance of success, for may In. Don't he dead one in a live prize offered.

race. Do something. Let friends see the votes they have cast for you were not absolutely wasted.

Avoid Mistakes

Frequently subscribers fail to get their paper because contestants fail to write them properly. To (it more convenient, just phone in avoid errors write old subscribers the name, or write, and we will fill as the name appears on the old list. Use the initial or given name as they appear on the old list.) And other person. Several if you wish, mark "New" and "Old" with care. After being nominated, then An "Old" subscription is any payment made by a person who was getting the paper at time you took the subscription. All others are "New."

Avoid Regrets

If you fail to make the biggest report you are capable of making on the Club offer, you will probably regret it after the period of giving big votes has passed forever. Never mind about the end of the contest. Secure the big votes while they may be had. If you want that classy Sedan you will do your big work this week.

HARDING MAKES FINAL

PROPOSAL FOR RAIL PEACE

Asks Men to Return to Work
and Let Labor Board Settle
Seniority Issue.

Washington, Aug. 7.—President Harding today called on striking shgpmen to return to work, requested the railroads to assign them to work and asked both the workmen and carriers to submit the disputed question of seniority to the Railroad Labor Board.

The President sent telegrams to B. M. Jewell, head of the Railroad Shopmen's union, and T. Dewitt Cuyler, chairman of the Association of Railway Executives outlining the plan which he hoped would result in speedy termination of the strike.

Mr. Harding in his messages asked that both parties to the dispute agree to comply with the decision rendered on seniority by the Railroad Labor Board.

The further statement was made by the President that he was mindful of the prestige of both the executives and the striking workmen to recognize the validity of all decisions by the Railroad Labor Board. It was also pointed out that the question of seniority "which the executives rejected," as outlined recently in a settlement plan proposed by him, "remains in dispute without a settlement."

This statement was followed by a statement at the White House that Mr. Harding regarded his new government as a trial experiment in the question of seniority, and that the railroads, in order to increase the country's prosperity, will be compelled to take a stand on seniority in the coal fields.

IRVING HARRISON DEAD

Island, Ky., July 26. Irving Harrison, age 32, died Tuesday night of tuberculosis. He is survived by two sisters, Mrs. William Wade, of Island, and Mrs. John Ball, of Ohio. His brother, Gordon Harrison, of Toledo, Ohio, died recently. The funeral service was conducted by the Methodist church Thursday, with the Methodist pastor in charge of the services. Dr. W. H. Morrison, pastor of the First Baptist Church, officiated.

Mr. Harrison died several years ago and was very frail in his last days. He was a carpenter, who was fondly attached to his family, particularly his wife. His beloved relatives have our sympathy.

MRS. AND MRS. E. B. TAYLOR

RECEIVED FOR HOUSE Guests

Mr. and Mrs. E. B. Taylor, of Beaver Dam, gave a 6 o'clock dinner Thursday evening in honor of their house guests, Madeline V. Travis and J. L. Lallier, of Beaver Dam; G. W. Brumfield, agent of the Kentucky Power and Light Company, of Louisville; Miss Myrtle Park, Detroit; W. A. McKinney, Ballyville, S. A.; and Kirby Park. The table was elegantly decorated in a centerpiece of Queen Anne's lace and sweet peas with a border of maiden hair fern.

Other guests present were Mr. and Mrs. J. E. Williams, Dr. and Mrs. J. D. McKinney, Mr. and Mrs. Porter Barnes, Dr. and Mrs. J. A. Tappan.

EX-SOLDIER MURKIN DIES

The Red Cross, The American Legion and the disabled Veterans Welfare Board urge you to file your claim for compensation and vocational training at once. Under the present ruling you cannot apply later than Aug. 31, 1922. Even though your disability may be slight it may increase later, and in order to secure compensation later it is imperative that you apply now.

Call at my office, Main St., Hartford, Ky., bringing your discharge and any other papers connected with your army service. This service is given by the Red Cross, and costs you nothing. Act at once.

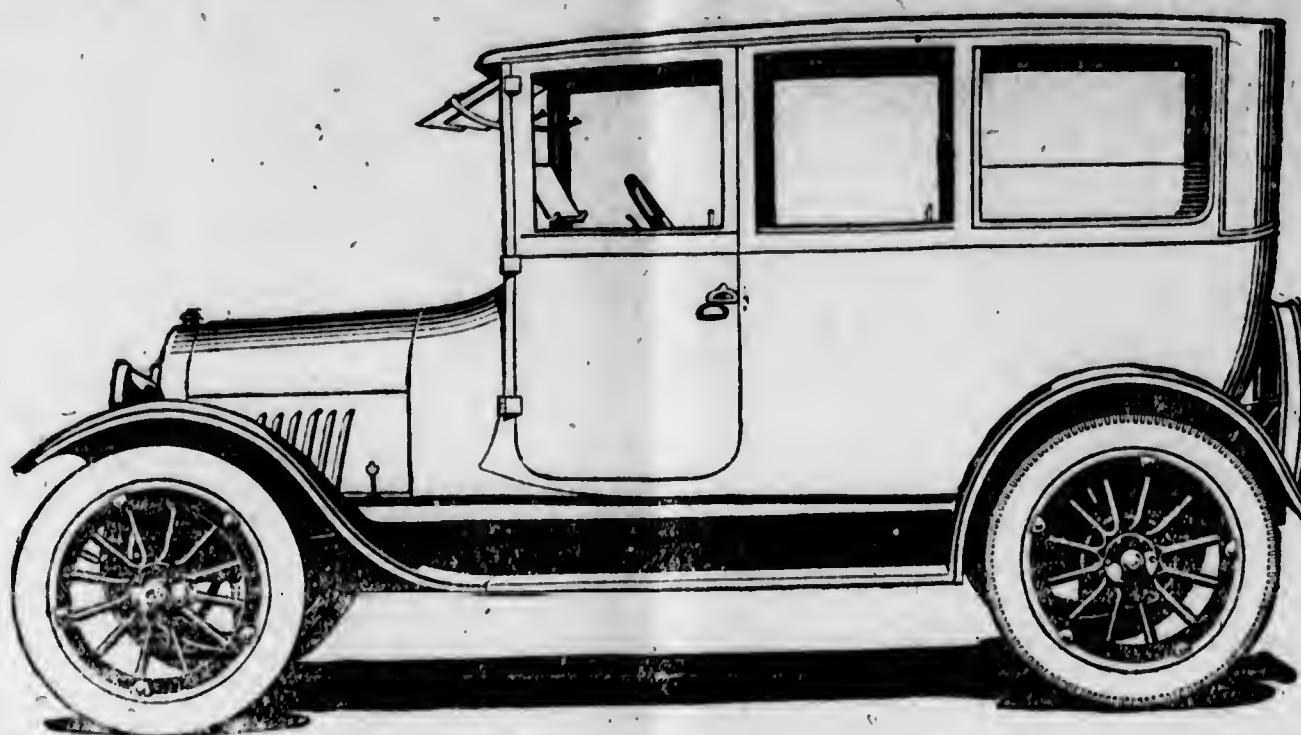

G. G. CROWE,
Red Cross Secretary.

Tax Commissioner—R. F. Keown, Fordsville.

Treasurer—C. O. Hunter.

Surveyor—C. S. Moxley, Fordsville.

Representative—Ira Jones, White Run.

I. C. C. DECLARES EMERGENCY TO EXIST

PRIORITY ORDERS ISSUED AND FEDERAL EMERGENCY COAL CONTROL IN OPERATION.

Washington, Aug. 5.—Mobilized to meet the crisis of a nation-wide fuel shortage, federal agencies, producing operators and railroad traffic experts awaited tonight the word from President Harding to set in motion the administration machine for emergency coal control.

The Interstate Commerce commission declared an emergency existed on roads east of the Mississippi river. This formal announcement of the carriers' inability to serve the public in the transportation of necessities opened the way for the distribution of coal under the plan unanimously adopted by representatives of the producing fields, in conference with Secretary Hoover.

The directing agent of the emergency machine—a presidential committee chosen from the Interstate Commerce commission, the departments of commerce, justice and interior with Secretary Hoover as chairman—will be named by President Harding tomorrow, according to administration officials. This committee, with the aid of an administration committee of operators, railroads, traffic experts and probably oil, will direct the activities of local delegations, devoted to the dissemination of operators in maintaining fair prices and in distributing fuel to the carriers and other public utilities in the order of preference established by the Interstate Commerce commission as best suited to serve the needs of the general public.

TWO ORDERS ISSUED

Two orders were also issued by the commission. The first directed railroads all over the United States to disregard usual or questioned routing of shipments in favor of such routing as would expedite movement and avoid congestion, while the second established a system of preference and priorities in shipments over all roads east of the Mississippi.

Though the preference system, sketched in the second mandate, entitled Service Order Number 23, said that priority should be given in the movement of food, livestock, perishable products, and coal and other fuels, all of its details were devoted to facilitating the government plan for distributing coal.

Railroads were directed to supply coal cars to mines "for such special purposes as may from time to time be designated by the company or its agents"; therefore, the agent mentioned being the presidential committee which will direct coal distribution. These special needs having been cared for, carriers were directed to use all equipment for transporting fuel, first, in railroads and other common carriers; second, to public utilities, street railways, power, light, gas, waterworks, ice plants and hospitals; third, to government, local, state and federal bodies; and fourth, this applying only to coal carriers reaching Kentucky, Tennessee, Alabama, Pennsylvania, Ohio and West Virginia, for shipments via Lake Erie ports to Lake Superior ports. Domestic fuel coal generally was given the next place in the preference list.

PREVENTED FROM DIVERTING

Railways were forbidden to divert or recognize shipments except as they might be needed for a superior use under the order of classification set forth. They were further required to discontinue use of cars suitable for coal shipments in any other traffic and railroads not serving mines were required to begin daily deliveries of suitable coal cars to coal carriers.

The order giving priority for food and other shipments was qualified by a clause stating that such preference should be shown by a carrier only "to the extent that it is to be unable to transport all freight traffic offered it for movement."

In the routing orders, applying all over the United States, the commission required the roads to disregard existing contracts and agreements applying to freight revenue divisions.

EFFECTIVE TODAY

Both orders were made effective "from and after July 26," and were based on authority delegated to the commission by the transportation act. The present emergency was declared in order Number 22 to arise, because "each of such carriers, by reason of unfavorable labor conditions and shortage of fuel, is unable to transport the traffic offered its office to properly serve the public."

The priority order Number 23 spent Saturday night and Sunday gave no reason for the emergency with Mr. and Mrs. Charley Hoover, which declared to exist, but said the

carriers could not "completely serve Grayson County, are visiting relatives in the transportation of lives in this vicinity."

The only geographical area entitled to reference under the order exists in the northwest where the supply of coal is customarily moved by way of the Great Lakes in summer months. This system was adopted in 1920, though great complaint was occasioned in other territories, on the ground that unless adequate coal was furnished in the summer, railroads would not be able to handle enough of it in winter even though it could be mined.

It was expected that the "special purposes" classification set up in the commission order would be the foundation of the entire price controlling effort of the governments coal distribution plan, by serving to prevent ears getting to mines whose owners did not take fair prices.

NATIONAL RED CROSS CONVENTION

Washington, July 22.—Announcement was made today from National Red Cross Headquarters of the Annual Convention of the American Red Cross to be held in Washington, October 9, 10 and 11, 1922.

This convention is the annual gathering of the representatives of the Chapters of the Red Cross of the United States, each one entitled to at least one seat in the convention.

It is expected that there will be a large attendance owing to the importance of subjects to be considered. While much of the time will be absorbed in plenary sessions, the delegates, devoted to the dissemination and the transaction of business, there will be several public sessions devoted to programs of a more popular character. At the opening session on Monday morning, October 9, the delegates will be addressed by President Harding, who is Ex-Officio President of the American Red Cross.

The afternoon of the first day will be devoted entirely to the interests of the ex-service man and his family, when addresses will be made by General Pershing, Commander McNider of the American Legion, and Colonel Forbes of the Veterans' Bureau.

The evening program will concern itself with the foreign work of the Red Cross, which has just been closed, and will be in the nature of a review of what has been accomplished, addresses being delivered by Secretary of Commerce Hoover, Sir Claude Hill, Chairman of the League of Red Cross Societies, and Dr. A. Ross Hill, Vice Chairman of the American Red Cross in Charge of Foreign Operations.

Another evening session will be presided over by Chief Justice Taft, for many years Chairman of the American Red Cross, and addresses will be delivered by Colletor-General James Beck, Dr. Livingston Farrand, President of Cornell University, and Mrs. August Belmont.

Arrangements are being made for transportation rates from all parts of the country and reservations are being made for the entertainment of delegates. Sessions of the Convention will be held in the Continental Memorial Hall of the Daughters of the American Revolution.

Mr. and Mrs. John Stewart, Mr. and Mrs. Chester Stewart, all of Central Grove, visited Mr. and Mrs. Frank Maples a few days ago.

Mr. and Mrs. Bill Laws will leave next Tuesday for Chicago.

Sunday School is progressing nicely at Hamlin's Chapel. There will be a children's day there the first Sunday in August. Rev. R. T. Thompson will preach there the same day.

Mr. and Mrs. John B. Carter of Central City, were the guests of Mr. Carter's parents, Mr. and Mrs. Lydia Maples, recently.

Mr. and Mrs. Bill Maples of Illinois, were the guests of their friend, Mrs. Minnie Pickard, recently.

Mr. and Mrs. Bill Laws and Mrs. Tom Tatum were the guests of their aunt at Cromwell, Friday.

Mrs. Mary and Eva Laws spent the week-end with their aunt, Mrs. Tom Tatum.

Mr. and Mrs. Jim Clegg were the guests of Mr. and Mrs. Gilbert Jolly, Saturday and Sunday. They motored over to Central Grove Church to hear Rev. Stewart preach. He preached a fine sermon. The house was crowded.

Mrs. Sam Alya who was the guest of her daughter, Mrs. Thelma Pickard, for a month has returned to her home at Owensboro.

Mrs. Katie Chapman and little Jessie and Miss Vera Hawkins, of Chicago, visited their father and mother, Mr. and Mrs. Strother Hawkins, recently.

Mr. William Lake and wife and little granddaughter, Ernestine Lake, of Washington, were guests of Mr. and Mrs. M. G. Funk, Saturday night and Sunday.

Mr. John Willis, of Dukehurst, is going into the merchantile business here in the store house of Mr. Thomas Murray.

Mrs. T. C. Park is on the sick list.

EASTVIEW

July 24.—A heavy rain, wind and electrical storm passed over this section Sunday evening.

Rev. Birch Shields, of Cromwell, gave no reason for the emergency with Mr. and Mrs. Charley Hoover, which declared to exist, but said the

"ASK THEM"

When the hot months come,
And the cream won't raise,
Tho you keep it in water,
For days and days.

You wonder why.
Your neighbors don't fret,
And keep their milk.
Where it's cool and wet.

Then you ship a can,
And think its funny,
They ship the same,
And get more money.

Then ask them WHY;
The same story they'll tell,
It's a DE LAVAL.
The kind we sell.

HARTFORD HERALD, ONLY \$1.50 THE YEAR

Thorough Soil Preparation Is Easy the Fordson Way

BECAUSE the Fordson has plenty of power and is fast running, Fordson farms are known in the best class farm in the community. Thorough plowing can be followed promptly by good discing because the man who drives a Fordson is soon through with one job and ready for the other. Thorough tillage, of course, results in bigger crop yields.

Because of its scientific design and easy handling qualities, the RODERICK LEAN AUTOMATIC ENGINE DISC HARROW, specially designed for the Fordson, inspires its owners to pulverize thoroughly both before and after plowing.

THE RODERICK LEAN AUTOMATIC is as necessary to economical tractor farming as the special tractor plow. Operated from the tractor seat, it provides easy, thorough soil preparation with the Fordson. Strong for power requirements, flexible for short turning, and adjustable to meet all soil conditions. This is the proper disc for Fordson tractors—the one disc harrow preferred by Fordson owners.

**MRS. MARY WESTERFIELD
DIES AFTER LONG ILLNESS**

Mrs. Mary Westerfield, wife of

John C. Westerfield, died at the
City hospital, Owensboro, last Wed-
nesday night at nine o'clock after
undergoing an operation the previous
Thursday, for tumor, from
which she had been suffering for
more than a year. She was 46 years
of age, and a daughter of the late
Louis A. and Georgie Ann (Knavé)
Sharp. She was born in Daviess
County, near Whitesville, where she
resided until she was 13 years of
age, when she with her parents
moved to the Magan community in
this county. On January 7, 1892,
she was married to Mr. John C.
Westerfield, to which union were
born seven children, three of whom
died in infancy. At the time of her
death, her home was in the Taffy
neighborhood, and had been for the
past year. She was a member of the
Antioch Christian Church, and a
devoted Christian, wife and mother
a splendid type of woman, and
well-loved by all who knew her. She
will be greatly missed by her friends
and associates as well as by her
family. In addition to her grief
stricken husband she is survived by
three daughters: Mrs. Ronne Hel-
der, Sunnyside; Mrs. Jesse Brown,
near Donafield and Mrs. Protus Tay-
lor, of the Taffy country, one son,
Elvis, fourteen years of age, one
sister, Mrs. Ned Moseley and one
brother, Mr. James Sharp, of the
Magan community, four grandchil-
dren and a number of other relatives
to mourn her loss.

Funeral services were conducted
from the Pleasant Hill Baptist
church, Magan, Thursday afternoon,
at 2 o'clock, the Rev. A. P. Kelley
officiating. The remains were laid
to rest in the church cemetery.

SINGING AT LIBERTY

According to announcement the
Ohio County Singing Convention
met at Liberty, Sunday. Despite
the downpour of rain quite a crowd
assembled and at 11:30 the house
was called to order and after the
opening song and prayer by Mrs.
Minnie Barnard, C. K. Carson was
elected chairman and H. L. Taylor
secretary; then we were dismissed
for dinner.

Again called to order at 1:30 and
after prayer by Bro. Riggs, the
following programme was announced,
the classes being present, viz:

Liberty, No Creek, Williams' Mines
and Hickory. After special music,
two quartettes by Liberty, one
quartette by No Creek, one duet by
Williams' Mines, the classes were to
sing two rounds, two songs to each
class each time. About 4:30 we
were through with our programme
and feeling we had spent a very
pleasant day, then with a few well-
chosen remarks by Rev. W. S. Buck-
ner, adjourned to meet with the
Williams' Mines choir the 5th Sun-
day in October.

C. K. CARSON, Chmn.
H. L. TAYLOR, Secy.

vened in annual session at Beulah
Church in Bede, yesterday after-
noon, for a three day session. We
hope to have a full report in next
issue.

Master Morton Walker, and little
Miss Caroline Brown Rendier, city
left Wednesday for Owensesbo, where they will spend a week as
the guests of their aunt, Mrs. A. P.
Taylor and family.

Mrs. C. W. Harris and daughter,
Miss Evada, of St. Cloud, Florida,
and Mrs. V. G. Barnett, of Stutt-
gart, Ark., will arrive the last of
the week to visit Mrs. A. M. Bar-
nett.

Aug. 23rd. to 26th. will be the
big Rockport Fair. The indications
are that the attendance this year
will be largely increased. The
grounds are park-like and beautiful.
Come.

Miss Norine Burnett, who has
been taking the teachers' training
course in the University of Ken-
tucky, is visiting friends at Mt.
Vernon and will return home the
last of the week.

Miss Bonner, who are spending
the summer in this city, returned
to their home at Barrett's Ferry,
Friday, where they will spend a
few days canning fruit.

Mr. John Johnson, employed
near Decatur, Ala., spent from Fri-
day until Monday afternoon with
his family here. He was accom-
panied by little Miss Francis Pier-
son, of the southern city.

LOCAL DASHES

Mr. Samuel Bennett, of near Nar-
rows, is dangerously ill.

See your friends at the Rockport
Fair, Aug. 23rd. to 26th. 32-31

Mr. Estill Brown, of Equality, was
a welcome caller at this office Sat-
urday.

Mr. Ellis Lloyd, of near Narrows,
is in the employ of The Herald for
a few days.

The No Creek P. T. A. will give
an ice cream supper at the No Creek
schoolhouse Saturday, Aug. 12th.

There's a good ferry at Rockport,
Ind. Get in your car and come on
over to the Fair, Aug. 23rd. to 26th.

Miss Mattie Duke, who has been
taking the teachers' training course
in the University of Kentucky, has
returned home.

Mr. and Mrs. Ted Maddox and
little daughter, Pearl, who have
been visiting their sister, Mrs.
Celeste B. White, of this city, and
brothers, Messrs. E. H. Maddox, and
Arlis Maddox, McHenry, will re-
turn to their home in Linton,
Ind., Monday.

Mr. James H. Williams has re-
ceived his commission as registrar
of vital statistics in the local dis-
trict and is now attending to the
duties of the office. His term is
for four years. Dr. J. B. Tappan
was registrar during the four year
term just closed.

Mrs. Carrie Williams, of Shreve-
port, La., and her sister, Miss Dora
Gibson, of Jennings, La., who have
been visiting Mr. and Mrs. J. A.
Caldwell and other relatives in the
Goshen community, have returned to
Hartford where they are the guests
of Judge and Mrs. J. S. Glenn.

Mr. J. Leslie Hagerman has re-
signed his position as machinist
operator for the Masonic Home
Journal, Lintonville, and will accept
a position with C. B. Carden & Co.,
Hartford, of which firm his father,
Mr. J. Y. Hagerman, is a member.
He with his wife arrived in this
city, Saturday.

Mrs. J. Walter Greep, of Com-
merce, Texas, is the guest of her
parents, Mr. and Mrs. Thad Barnard
of Hartford, R. F. D. No. 2. Rev.
Greep is now engaged in a series of
meetings and will join her here
later. Mrs. Greep spent Sunday
with her sister, Mrs. Bannan Wells,
and Mr. Wells, of this city.

Mr. Henry Y. Taylor, who has been
making his home with his daugh-
ter, Mrs. Howard Ellis, and Mr.
Ellis, of this city, for some time,
became dangerously ill last week
and was removed to the Owensesbo
City Hospital Friday, where spec-
ialists pronounced his trouble can-
cer of the stomach. His recovery
is very doubtful.

Mr. and Mrs. D. W. Williams and
little daughter, Ellen Lorene, of
Pittsburg, Ga., and Mrs. Williams'
mother, Mrs. J. T. Thomas, of
Chattanooga, Tennessee, motored
through to this city, arriving last
Thursday evening to be the guests
of Mr. Williams' parents, Mr. and
Mrs. A. J. Williams, and other rela-
tives until the latter part of this
week.

Prof. and Mrs. W. A. Bell, who
have been attending the University of
Kentucky this summer, passed
through here, Tuesday, enroute to the
Buford community, to visit Prof.
Bell's parents, Mr. and Mrs. S. W.
Bell. Prof. and Mrs. Bell will leave
the latter part of the month for Thorpe,
W. Va., where the former will be principal of a consolidated
school and the latter an assistant.

Mr. and Mrs. T. L. Lewis and
daughters, Miss Oma F. and Mrs.
Cleveland Robbins, and the latter's
little son, Thomas L., who reside in
Jefferson County, 15 miles out of
Louisville, on the Dixie highway,
spent Wednesday night in Hartford,
where Mr. Lewis was born and rear-
ed. Mr. Lewis is a grandson of the
late William (Billie) Field. The
party motored to the Buford country
Thursday to view some of the old
landmarks and to see some of the
older residents of that section.

A car containing four young peo-
ple, whose names have not been re-
ported, ran into two electric light
poles on the corner near the Com-
mercial Hotel, late Wednesday,

breaking the lights and windshield
on the car but doing no injury to the
occupants. It seems that a young
lady was driving and as the car was

turning the corner the young man on
the front seat fearing the lady

could not make the curve properly
seized the wheel causing the acci-
dent. One of the poles was knocked
from its base and would have fallen
had it not been wired to the other
pole.

FOR SALE OR RENT—Blacksmith

Mr. and Mrs. E. D. Turley and lit-
tle son, Edward, of Chicago Ill., ar-
rived here last Tuesday evening to
spend several weeks with Mrs. Tur-
ley's parents, Mr. and Mrs. A. J.
Williams and other relatives.

Mrs. Eliza Barrett and daughter,
Miss Bonner, who are spending
the summer in this city, returned
to their home at Barrett's Ferry,
Friday, where they will spend a
few days canning fruit.

Mr. John Johnson, employed
near Decatur, Ala., spent from Fri-
day until Monday afternoon with
his family here. He was accom-
panied by little Miss Francis Pier-
son, of the southern city.

Mr. and Mrs. W. R. Fuqua and Mr.
Richard Fuqua, of this city, re-
turned Wednesday after spending a
week touring the bluegrass section
of the state. They made the trip
by auto and visited among other
cities, Louisville, Frankfort and
Lexington. They were joined in
Louisville by Mr. and Mrs. G. E.
Fuqua, who made the remainder of
the trip with them.

Major Douglas D. Felix, another
former Hartford boy who has made
his mark in the big world, being
now a successful attorney at Wash-
ington, D. C., spent a few hours here

Friday the very welcome guest of
the editor and other old friends and
neighbors. Major Felix is now

DURANT**Just a Real Good Car**

THERE is a wealth of meaning in the phrase "Just a Real Good Car." In it are incorporated the ideals of W. C. Durant's thirty five years' experience as a manufacturer of vehicles, as a builder of more than two million automobiles. The Durant brought fame to itself in a short time for it does its work well. It keeps going every day. It is not a bother. The mechanism is hardly ever brought to the attention of the owner. It piles up mileage without any appreciable wear and does this at little cost.

The Durant Car represents sound mechanical design; simplicity of construction; dependability and durability; power for all occasions, easily controlled; real riding comfort; appearance that is modern and always in good taste; completeness of appointments and equipment; and economy in operation. These are the qualities which justify the phrase

Try to Get in

DO YOU WANT
\$1,000,000

What would you do with it—if you had made it overnight? How would you feel? What would you do with it if you made the \$100,000?—if you were the same day before—would you want to hobnob with the same old friends? You can form an opinion better than you see.

"WITHOUT FEAR"

Featuring Charming
 Pearl White

IDEAL THEATER

Beaver Dam, Ky.

Thursday, August 10, 1922

A tense drama of RED blood and BLUE—of a man who made a million and how he used it and how it affected him. One Show 7:30—first three reels run twice.

YOUR LAST CHANCE

Saturday, August 12, 1922

to see "NERVY" BUCK JONES in this season's picture.

"TROOPER O'NEIL"

A tale of love and duty in the northwest—where an outlaw can go on being bad until the Northwest Mounted gets on his trail—then he stops being bad or he stops—breathing.

Also A LAUGH LOOSENER

"THE PICKNINNY"

Worth the price of admission in laughs, a comedy that will tickle you from the bottom of your soles.

Two shows 7:15 and 9:00.

TENSE! GRIPPING! HEART STIRRING!

In its rush of action—that's

"The Mysterious Rider"

A wonderful, thrilling, sweeping story of adventure and mystery in the "GOLDEN WEST" by the most popular biog author to-day

6-reel treat

One you'll remember

"ZANE GREY"

The man who wrote "RIDERS of the PURPLE SAGE," "THE RAINBOW TRAIL" and "U. P. TRAIL." Lots of our patrons asked us after the show Saturday night, "Where are you going to have "THE MYSTERIOUS RIDER?"—we're sure are going to see it, because U. P. Trail is the best picture they had seen—so take it from us you'll see a good show, but you'll have to come early or stand like some of them did Saturday—they are all coming.

Monday, August 12, 1922.

Show starts at 7:30—first three reels will be shown twice so that you will get to see the whole show if late.

Also a comedy

Admission to shows 20cts.

And don't forget the talk of 'em all each night

Our Music

Feeling Blue? Note the time place and remedy.

Coming "From the Manger to the Cross" Life of Christ 7-reels.

Mrs. J. W. Thomas, of Rosine, who has been ill for several months, Ington country, who underwent surgery, is slowly improving. She has been operation in Owensboro last week undergoing X-ray treatments and returned to that city Friday for additional treatment.

Mrs. C. M. Barnett, city, left Thursday for Nashville, Tenn., where she will spend three weeks with her daughter, Mrs. E. W. Cooper, and Mr. Cooper.

RADIO

MORE ABOUT VACUUM TUBE AS A DETECTOR

How a "Three-Electrode" Is Connected in a Simple Radio Receiving Circuit.

Obviously working the tube at a point on the upper bend of knee of the characteristic curve would produce the same symmetrical changes in the plate circuit current and the tube would not function as a detector.

Fig. 10 shows how a three-electrode vacuum tube is connected in a simple radio receiving circuit. The "B" battery furnishing the necessary plate potential is connected with its positive side through the phones to the plate. The filament is heated to the required temperature by the battery "A." The incoming radio frequency alternating current is applied to the grid and the negative side of the filament through the "C" battery. By connecting the negative side of the filament to the midpoint of the "C" battery a positive potential can be applied to the grid by moving the slider on the "C" battery potentiometer up, or the grid can be made negative with respect to the filament by moving the slider on the "C" battery potentiometer down.

In practice a "C" battery is not used to force a three-electrode vacuum tube to function as a detector.

Fig. 11 shows how a so-called grid condenser and a grid leak resistance are used in conjunction with a three-element vacuum tube so that it will function as a detector in a radio receiving circuit.

The grid condenser is connected in series with the grid of the tube and shunted by the grid leak resistance.

When the curve is shown in Fig. 11, the alternating current applied to the grid would now produce a large decrease and a small increase of the plate current, the reverse of that shown in Fig. 10. The objection to working the tube on the upper bend of knee of the curve is that when no potential is applied to the grid a relatively large

current would flow in the plate circuit and rapidly exhaust the "B" battery.

Should the tube, by means of the potential applied to the grid, be made to operate at a point on the characteristic curve midway between the upper and lower bends—that is, on the straight part of the curve, symmetrical variations in the grid potential would cause symmetrical change in the

current flowing in the plate circuit and rapidly exhaust the "B" battery.

"Circuit—Under no consideration should the connection from the electric light socket be brought directly into contact with the ground connection, or fuses will be blown in the house circuit and the whole house left without light. Operators should also be careful about making contact themselves bodily with the electric light wire and ground at the same time, in order to avoid shock."

Experts Tell the Safe Way to Employ This System for Radio Receiving.

Since the announcement that the Bureau of Standards of the Department of Commerce had perfected a method of employing electric light wires in place of aerials, considerable experimenting has been done by various amateurs, some of whom have had good luck while others succeeded only in blowing a large number of fuses.

Members of an eastern electric light company have offered the following suggestion to amateurs:

"First—Successful results have been obtained so far only with audion tubes. Crystal sets receive the signals, but for some reason they are very weak and indistinct."

"Second—No set should be used on this system without air or oil-filled condensers placed in series with either the antenna circuit or the ground circuit—preferably in the antenna circuit."

"Third—A fuse not heavier than one-half ampere should be used in series and just ahead of the antenna connection."

"Fourth—An ordinary separate detachable plug, i. e., one with two blades, one of the two separate halves of the plug is used. Only one wire is run from this plug, the other binding screw left undisturbed. This single conductor wire should be long enough to reach from a handy electric light socket to the table where the instrument is located and should terminate in the fuse mentioned above."

Now the fans in England are having a hard time with their air. According to a report from England there are only 8,000 authorized amateur operators in the United Kingdom. The London Daily Mail states that the reason for the air's torpid growth is the fact that "hampering and senseless restrictions to this country prevent wireless amateurs from getting practice. The old furies of the army and navy air forces are afraid of the amateurs and use their influence in having the post office authorities impose impossible and vexatious restrictions that limit the field."

"Screw the attachment plug into the electric light socket and tone as usual. In case no signals are received reverse the blades in the attachment plug by simply pulling the attachment

SHORT FLASHES

The first national radio communication station on the Great Lakes was recently dedicated. Other stations will shortly be in service when the "graveyard" of the lakes will have lost its terrors.

It is claimed that John Hayes Thompson, Jr., and Dr. E. L. Chaffee have invented an appliance that business secrecy in wireless. The system is based on principle of producing electro-acoustic waves to which only especially equipped receivers are responsive.

Secretary Hoover's force of "ether cops" may take the form of special government detecting stations where aerial compasses could be arranged so as to detect the direction from which interruptions come. By a series of relays, the government station nearest the violating amateur could be notified and the source of trouble stopped.

Now the fans in England are having a hard time with their air. According to a report from England there are only 8,000 authorized amateur operators in the United Kingdom. The London Daily Mail states that the reason for the air's torpid growth is the fact that "hampering and senseless restrictions to this country prevent wireless amateurs from getting practice. FARM EXTRACTS

INFORMATION FROM THE EXPERIMENT STATION — AGRICULTURAL PAPERS AND THE COUNTY AGENT'S OFFICE

Cows Require Grain As Pastures state leader of junior agricultural club work at the College of Agriculture. Approximately 38 counties are expected to send teams to the event. Twenty-three counties competed in 1921, the first year the contest was held. Competition of the College of Agriculture, in view of the fact that many pastures do not furnish this much grass during the summer, some form of grain feed is necessary if counties already have held contests between various communities is to be kept up.

Farmers and dairymen are apt to overlook these facts in assuming that milk producing cows can obtain enough grass to sustain them. Interested persons and firms pastures make it doubly important in several counties already have that the cow should be given the potted as much as \$100 which will necessary grain feed. A fall in milk flow at this time will be hard test in their district. Each team in to bring up later in the season, it was pointed out.

"A good grain mixture consists of four pounds of corn meal, two pounds of wheat bran or shipstuffs, and two pounds of cottonseed meal. Enough of this mixture should be fed to keep the cows in good condition. On the Kentucky Agricultural Experiment Station farm, one pound of grain mixture is fed for each three and one-half pounds of milk that the cow is giving. Hay and silage are not fed as grass is counted upon to take their place. A field of Sudan grass can fill an important place in the feeding of the dairy cow at this time of the year as the crop can be cut and hauled to the cows to supplement the short pastures. If Sudan grass is not available, green corn can be cut and fed at a profit to supplement a failing grass supply."

It was pointed out that supplemental grain feeds and forage crops can be used profitably only by dairymen who have a market for whole milk at a good price. Butterfat for milk for cheese factories does not pay enough profits to justify the farmer in feeding grain to his cows, it was said.

McLean Farmers Unite For Herd Improvement

Interested McLean county farmers who are co-operating with the extension division of the College of Agriculture are taking steps to build up dairy herds in that section of the State which eventually should make the county one of the outstanding ones in Kentucky's dairy industry, according to E. M. Prewitt, dairy extension specialist of the college.

Following the recent organization of a co-operative purebred Jersey sire association, which was promoted by County Agent R. H. Ford and the extension division, those interested in dairy herd improvement set about to bring bred registered Jersey heifers into the county to be used as the foundation stock for high producing dairy herds.

The newly organized sire association has a total of 48 members who own three high-class Jersey sires cooperatively. The organization is divided into three blocks, each one of which has the use of one of the sires for two years after which the animals will be changed to different Jersey bulls. By this means members of the association will be able to obtain the services of a good sire over a period of six years with the added advantage of small cost.

Materials required for the installation of such a system in the average home include an enameled kitchen sink and fittings, such as a sump for waste water, a drain board, a one-and-a-half-inch drain pipe and fittings, a one-and-a-quarter-inch water pipe and fittings, a combined foot valve and strainer and some four-inch agricultural drain pipe. The estimated cost of \$45 for this material can be reduced about \$10 by the use of a homemade sink back and drain board, the circular says.

The system as described in the circular provides for the protection of the well or cistern from surface pollution and the filtration of all cistern water in cases where the supply is from this source.

The pump used is an ordinary pitcher pump, with the cylinder in stock, that will lift water a vertical distance of 20 feet and carry it a horizontal distance of 50 feet. A substantial kitchen sink is called for in the description which also provides for a trap to prevent gases from the drain working back into the kitchen. The disposal factor in the development of McLean county's dairying. The calves that are produced will be saved with the idea of building up registered herds after which official testing of cows for butterfat production will be started.

Farm And Home News From Over Kentucky

Frank Morris and William Threlkeld are the latest Livingston county farmers to join the movement being directed against scrub breeding animals. Each of them has purchased a purebred Hampshire ram, County Agent L. C. Pace reports.

Nelson county farmers who are

Why We Handle and Recommend Crown Gasoline And Other Standard Oil Products

In the first place, there's none better made by anybody, anywhere.

If there were better, we know that the Standard would have it.

With the universally acknowledged responsibility, the unsurpassed equipment and cooperation of so great a public service institution as the Standard Oil Company (Ky.) to back us up in any statement we make, and in the service we give, we know that we can, and will, give you the most for your money in every purchase of gasoline, motor oil or any other Standard Oil product.

We don't try to "spoil" you into trading with us by mere assertions and technical terms. We "deliver the goods"—because we've got the goods to deliver.

Crown Gasoline is made right here in Kentucky by the Standard Oil Company, incorporated in Kentucky, from whose great modern refinery at Louisville, Ky., we get direct the pure, fresh, unadulterated product that's acknowledged the best by every test for your motor and pocketbook. Deal with us and play safe.

co-operating with County Agent C. L. Hill and the extension division of the College of Agriculture will use Anderson, games, stunts and lectures helped to make the day a profitable one for the youngsters.

Methods of controlling fruit diseases and insects together with proper spraying methods and the most profitable orchard management practices recently were pointed out to more than 50 interested orchard owners of Ballard county during a tour to some of the prominent orchards in that district, according to County Agent E. A. Whalin. The orchards of H. L. Nance, Frank Russell and C. M. Parsons were visited during the tour of inspection.

A total of 826 people attended a recent series of eight moving picture meetings held throughout Union county to point out recommended practices for the farm and home, County Agent L. C. Brewer says.

One hundred seventy-five Jefferson county farm boys and girls who are members of the Junior agricultural club in that county recently attended the picnic held for them.

A Tariff for the Profiteers. Tax Revision for the Buccaneers. A Ship Subsidy for the Privateers. Sonnen Seats for the Auctioneers.

he had not been confined to his bed in his lifetime a reality, common and the end was unexpected. Late place and marvelous yesterday, however, his condition became serious, and Dr. Ker, of the records at Washington as No. 174,465 has been called the most

house guest and a Sydneysian single patent ever issued in the whole history of invention. There

With Mr. Bell when he died were today over 13,000,000 telephone conversations through which billions of dollars are carried on each year.

The Inventor leaves another daughter, Mrs. E. Grosvenor, wife of a Washington magazine editor.

Dr. Bell will be buried on top of Mount Beinn Breagh, a spot chosen by himself.

Alexander Graham Bell lived to see experiments, which he began with a dead man's ear less than fifty years ago, result in a means of communication for millions of long-distance telephone conversations daily

morning at his estate near Baddeck, ability of talking over a wire, although the Inventor had been ridiculed then as a dream by almost everybody, except Bell, became dur-

On account of the Contest we are conducting we will be unusually crowded for space during the next five weeks. Please help us by sending in your weekly news letters so as to reach us by Saturday or otherwise a number will have to be omitted. We thank you in advance for this co-operation.

66 quickly relieves Colds, Constipation, Biliares and Headaches. A Fine Topic.
